

**SECTION 5.4**

**LOK-UP (No Parking or No Entry)**

Lok-up is a collapsible steel parking and vehicle access barrier that locks in both the up and down positions. Steel construction and large footprint ensure maximum strength and durability. The minimum closed height of 35mm opens up to a working height of 750mm. A large reflective sign face and safety yellow powder coated finish provide maximum visibility day or night.

**Value Features:**

- » Available in 2 different models.
- » Zinc plate and safety yellow powder coat.
- » It stands tall when locked up. 750mm tall.
- » It lays low when locked down. 35mm low.
- » Comes complete with padlock and fixings.
- » Large footprint for strong positive mounting into concrete or asphalt.
- » Reflective sign face for night visibility.
- » Locks in both the up and down positions.

**Specifications**

- Description:** Lock up / Lock down parking and access barrier.
- Material:** 4mm Mild Steel.
- Finish:** Zinc plated & Powder coated.
- Height:** Down 35mm. / Up 750mm.
- Weight:** Operating 6kgs approx. / Shipping 14kgs.

**SECTION 5.5**

**FOLD DOWN BOLLARD**

Our 'Fold Down' bollard model FD150 has been designed for applications such as vehicle access control and parking space protection. In the lay flat position the FD150 is only 80mm high allowing sufficient vehicle clearance.

In the upright position it stands 800mm high with a broad face of 150mm wide for greater visibility. This broad face also accepts an optional reflective sign face. Available as a surface mount model or can be used with an in-ground kit. P/N: BGK4 for setting into new concrete.

Reflective sign face ordered separately.

**Value Features:**

- » Stands 800mm tall when locked up.
- » Only 80mm high in the lay flat position.
- » Available in surface mount or used with in-ground kit.
- » Includes fixings and padlock.
- » Finished in high visibility safety yellow powder coat.
- » Broad 150mm Face accepts optional reflective sign face.

**Specifications:**

- Description:** Fold down access and parking barrier.
- Material:** Mild steel.
- Finish:** Safety yellow powder coat.
- Height:** Down 80mm / Up 800mm.
- Weight:** Operating 5kg. / Shipping 11kg.
- Fixing:** Surface mount 4 of 12 x 60mm. Masonry anchors.
- Locking:** 40mm padlock (supplied).
- Optional Sign:** Class 2 reflective sheeting 120 x 500mm.
