RC003/QK

RC003

RCTRY
+ LID
To suit RC001
+ RC001/CL

Features new unique latch mechanism & full length stainless steel hinge. All cases available in clear lids.

ROLA-CASE VERSATILITY

The Add On System grows to your personal requirements with vertical, horizontal couplings allowing for future expansion of your storage needs, with available space the only limitation.

The RC2, 3, 5FR are compatible vertically and the horizontal frame extension is achieved with the RC2, 3, 5FX. All product is supplied knocked down with instructions and an assembly service is available for simple installations.

Single & dual work tops are available, and extended versions for 3, 4 columns are available on request.

For any advise on your storage needs, contact your distributor or our service department.

Example configuration

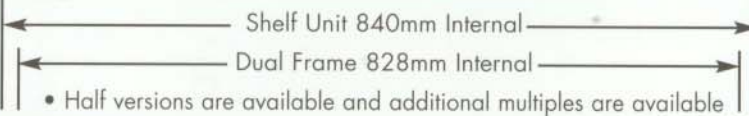

ROLA-CASE — ROLA-Shelf

WORK CENTRE MODULE

ROLA-CASE A multi-functional storage system allowing personal use of the **ROLA-CASE** which can build up and into a composite work centre module (incorporating the **ROLA-Shelf** System) suitable for vehicle and static installations.

EXAMPLE

EXAMPLE

ROLA-CASE INDUSTRIAL

ROLA-CASE (Storage System) offers industry and technology a wide range of storage methods for the transfer and handling of components, tools and instruments. The mobile work station allows production managers the flexibility of moving their entire range of service parts and tools within the service area while the static frame may house dedicated tools and equipment for a specific purpose.

The Dual model cat No RC7DM/EN is capable of holding up to 150kg with a compliment of up to 14 cases or a various combination of different size cases and shelves to suit your specific need.

For any advise on your needs contact your distributor or our service department.

PRODUCT SPECIFICATIONS

Cases manufactured from engineering polymers ABS, polycarbonate and nylon 66 to ensure extended product life.

Cases feature unique Auto shutting latch mechanism with stainless steel springs and hinge (ideal for marine use).

Numerous case and drawer sizes for various applications.

Individual cases moulded in 3-5mm wall sections for robust industrial use.

Cases available in conductive polymer for electro-static shielding meeting specifications: surface resistance equal to or less than 1.0×10^3 ohms P.O.A.

Drawer system designed for heavy duty industrial and commercial use with individual drawer holding 20kg.

Drawer system is expandable horizontally and vertically with case pitch adjustable for different case types.
