

Mekdrive - Mechanically Assisted Shelving

Mekdrive is revolutionising in-office storage. It is the lightest mechanically assisted mobile available by far. This keeps floor loads to a minimum, a major consideration in some high rise buildings. Its unique belt-drive technology moves bays effortlessly reducing operator strain and potential causes of injury. Mekdrive combines high volume storage with quick, easy and safe access to stored items.

Application

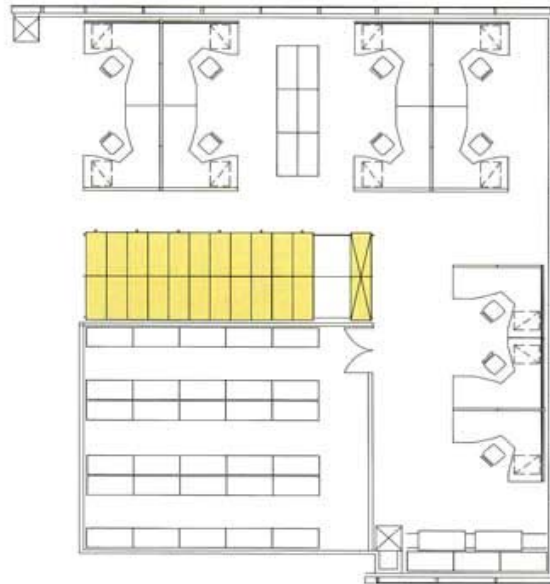

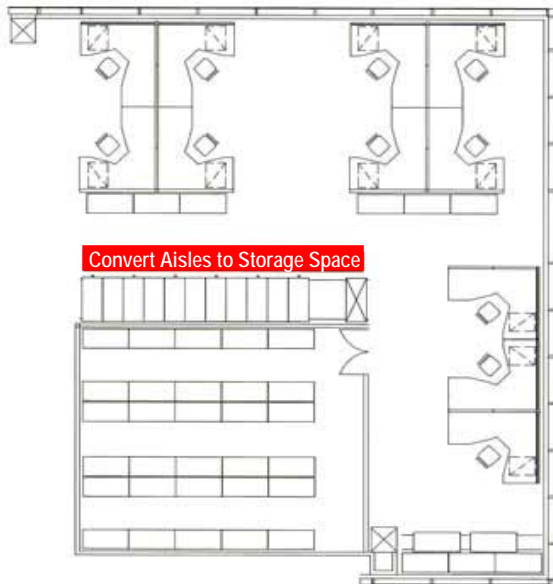

Ideal in any business or retail environment.

Specifications	Dimensions
Floor Fixing/Track Infill	No
Drive Type	Belt Drive
Max Movable Block Load	4 tonne

Shelf Carrying Capacity	30mm Shelf up to 130kg With stiffeners 240kgs
Shelf Pitch	25mm

BEFORE - Base Mounted Mobile

AFTER - mekdrive

The mekdrive belt drive system can be fitted to existing Freetrack systems without the need to empty shelves. (please also see "Freetrack - mobile shelving" brochure)

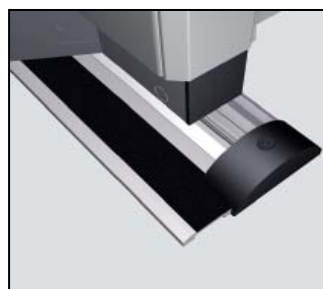

Features :

Better Distribution of Floor Load

mekdrive has multiple tracks allowing better distribution of floor loads and can be easily adjusted for floor settlement.

Unique Low Profile Tracks

Low profile tracks are not fixed to floor surfaces, so units can be easily relocated or expanded as needs require.

Operator Safety

The ergonomic hand wheel combined with ultra light operation reduces the risk of operator stress and injury. The unique belt drive technology provides whisper quiet operation.
