DRUM TROLLEY AND TRUCK

Multi Purpose Drum Trolley

The Multi Purpose Drum Trolley is very easy to load due to its swing axle, which moves the load centre back as you tilt the drum until it comes to rest on four wheels.

By pushing down on the handles, the MPDT turns into a drum stand to decant the drum's contents.

Internal wheels allow the drum to rotate in the stand to prevent leaks or to place the bung in the correct position.

Shipping Size 600x700x1550mm - 35kg

MPDT

Pallet Loading Drum Truck

An economical method of taking steel drums on and off standard pallets.

It uses a spring loaded beak in conjunction with chime engagement to safely handle drums.

The Pallet Loading Drum truck makes an ideal tool for moving drums around on uneven floors due to the large 280mm puncture proof wheels.
