

# DURABOX Longlife Storage - Solid Fibreboard Storage Boxes

- **Recycled & Recyclable Solid Durafibre**
- **Long Lasting**
- **More Fire Resistant**
- **Optional Lids cut rust, Dust and Corrosion**
- **Fit Standard Metal Shelves**

*Already proved 30,40,50 years by govt. warehouses, military etc.*

*Your Durabox with lid seals your stock from the atmosphere while its natural fibres breathe like leather to retard corrosion and exclude dust.*

Standard Durabox contents parts boxes are made from 1.8 mm thick solid fibre board  
 Durafibre board is 20%-30% more dense than ordinary box boards and to you this means:

1. Tougher, stronger boxes,
2. Greater fire resistance,
3. Greater moisture and oil resistant,
4. Longer life -better investment.

## Better Fire Rating

Here's what happened when a heavy duty blowtorch was focussed on 3 common materials

1. Corrugated Box - 5 to 10 seconds and it kept flaming/burning.
2. Plastic - 20 to 30 seconds burst into continuing flaming/burning
3. Durabox - 30 to 45 seconds glowed red, smoked and died back once torch removed.

## Tested Quality

4. Durafibre acid test because acidity greatly shortens board life,
5. Is that a Durabox under the car? Yes-it did gradually collapse but proved it could take the load first.
6. Shows grain direction. A Feature often overlooked. Durabox knows the correct grain makes a stronger box.

## Quality Features Built In

**Above :** wide steel " Strap-Staples" hold box together under tough loads.

**Left :** (arrowed) security flap on bottom of dividers stops small parts sliding underneath to next
