# CLASSIC TUG 1000 kg TO 5000 kg

Electrodrive

## Electrodrive TUG for Health Care and Industrial Applications

The Electrodrive Tug is a multi purpose battery powered industrial tractor. It is well suited to either industrial or clean indoor environments, such as hospitals. The Tug is a compact detachable towing device, that is capable of moving its load up or down a 1:12 ramp.

### The Tug can be used for moving objects such as:

Heavy trolleys, Large Wheeled bins, Hand Operated Fork Lifts, and Many Custom Applications

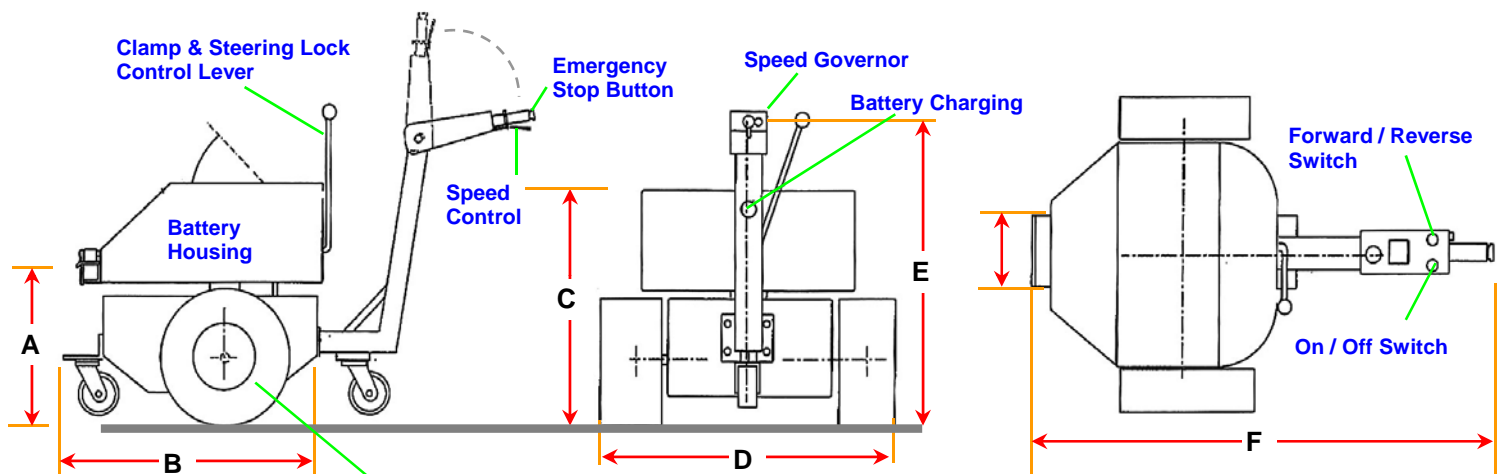

The Tug's primary purpose is to assist operators in moving heavy wheeled objects. This is done by way of an easy to use locking mechanism, which attaches the Tug to the load. Because the Tug is detachable, one Tug can serve a fleet of trolleys.

Larger capacity units built to your specifications available upon request - Up to 20 Tonne.

Move your existing manual trolleys with the unique battery powered Electrodrive Tug.

The Tug simply hooks on to a simple fitting on your existing trolley, converting your heavy trolley into an easy to move motorised assembly. The Electrodrive Tug allows one staff member to effortlessly and safely move heavy trolleys

Wheel 310mm Dia - Black Tyres Standard (optional Grey Tyres)
