## Hosplan Signage Systems (Australia Only)

Hosplan signs are designed to be free standing, wall mounted or suspended via a range of suitable fixing & installation methods to suit the needs of your site.

You can design your sign systems around Hosplan guidelines with a large range of colours to suit specific applications such as white letters on red for emergency or casualty.

Selected letter styles are chosen to provide type styles which offer legibility at distance while considering the local architecture and environment.

### 200/80 External Aluminium Sign Panel

**Directional, wayfinding and location signs for large scale sites and applications**

Single sided post or wall mounted sign panel, can be mounted back to back using mounting bracket onto a 50mm Aluminium square post.

Can be used in SIGN ONE signposting system either the 80mm round or 100mm square post.

### 100/40 External Aluminium Sign Panel

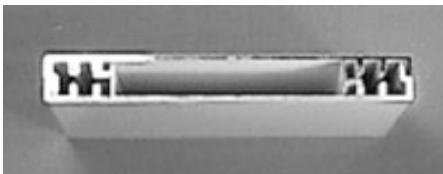

**Directional, wayfinding and location signs for medium scale sites and applications**

Single sided post or wall mounted sign panel, can be mounted back to back using mounting bracket onto a 50mm Aluminium square post.

Can be used in SIGN ONE signposting system either the 80mm round or 100mm square post.

### 100/40 Internal Aluminium Sign Panel

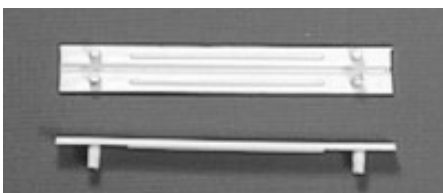

**Directional, wayfinding and location signs for small scale sites and applications**

Single or double sided mounted projecting or hanging sign panel, can be suspended by stainless wires using ceiling fixings.

Can be used in SIGN ONE signposting system either the 80mm round or 100mm square post.

### 100/40 Internal Plastic End Cap

This lightweight injection moulded plastic end cap provides 4 small locators which clip into the 100/40 aluminium extrusion.

The 100/40 end cap offers a low cost and simple method to cosing off the end of the 100/40 sign plank in both hanging and projecting formats.

Can be used in SIGN ONE signposting system either the 80mm round or 100mm square post.

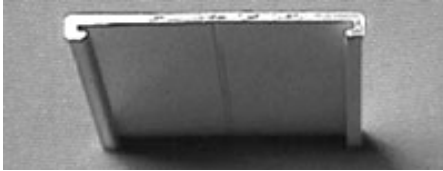

All prices/specifications subject to change without notice.
