AM-BOSS Roofsace Access Ladders

AUSTRALIA'S MOST POPULAR ACCESS LADDER

GUARANTEED FOR 20 YEARS

**"AM-BOSS" AUSTRALIA'S ONLY LADDER SYSTEM THAT COMPLIES TO THE BUILDING CODE OF AUSTRALIA
WE ARE THE SPECIALISTS**

The Access-Boss, with its strength, simple, practical and suited to commercial and domestic applications.

Intelligent Design Features

A spring assisted mechanism allows for a quick and easy operation. As the Access-Boss is constructed from welded aluminium it is strong and durable and all steel parts including springs are zinc plated. The ladder is mounted in such a way as to allow clearance between the steps and the ceiling hatch for safer footing. Handrail and slim fitted architraves are also available. Dust and draught sealing strips are standard on most types. All models feature concealed hinges. The ladder is fully adjustable and easily installed.

Tough and Durable

Ingenious spring system counter balance is designed in such a way that when the hatch is closed, the springs are almost relaxed ensuring life long service. The hatch has a built-in frame, and a rod is supplied to make opening of the hatch easy. Made in 3 sections for strength, easy operation and easy reach even at 3.3m. Available to order: 4 section ladders and special size manholes. Escape ladders are also available. (See link below: Top Opener & Escape Ladders)

Our type "Access-Boss" access ladder is manufactured in Aluminium with the flat non-slip treads welded into the stiles.

The "Access-Meister" is manufactured in top grade NZ Pine Timber.

Both types come fully assembled, concealed hinges, draft seal, counter balancing, neat metal architrave and installation is a breeze.

No Assembly, no cutting, no mistakes.

EASY SELECTION OF MODEL NO's: E.G. MODEL NO: 2460 NOMINATES A CEILING height of 2.4 to 2.6m. Model No: 2680, a ceiling height of 2.6 to 2.8m. Model No: 2830, a ceiling height of 2.8 to 3.0m, and so on. We do not believe in cutting to size, as the bottom step should be the same distance off the floor as the spacing's from all other steps!!!

Each unit comes with instructions and a pole to operate the unit. We have on the shelf models to a ceiling height of 3.6m but make models up to 5.8m. For more information contact Spacepac.

The Access-Boss, with its strength, simple, practical and trouble free design is extremely well suited to commercial and domestic applications. As well as this AM-BOSS access ladders are fully assembled and easily installed.
