

Replaces all previous versions

Effective 15th April 2011

FOLDABLE STEP PLATFORM CORROSION FREE

A specially designed climbing solution for corrosion-prone environments in industries such as mining, chemical processing and food processing.

A corrosion resistant version of the platforms is now available. Aluminium rungs have been replaced with fiberglass and other metal components have been replaced with 316 stainless steel.

• Repairability

The platforms have a modular build. All the major components, front section, rear section, platform, struts are bolted together so any piece can be easily replaced. Further the lower splayed legs are riveted to the main sections so they can be removed and replaced individually if damaged.

• Warranty

Three years on materials and workmanship.
 Does not cover damage due to mishandling, misadventure, transit damage (unless pre-delivery) etc.

• Australian Made

100% Australian designed and manufactured.

Accessories:

- Retractable safety rail
- Spring-loaded castors
- Leveling legs

STURDY STAINLESS STEEL PLATFORMS

OPTIONAL STAINLESS STEEL SAFETY RAIL

Awaiting Picture

OPTIONAL STAINLESS STEEL CASTERS

STAINLESS STEEL steps and fittings

Features:

- Folding - for easy storage
- Sturdy and durable
- Lightweight and easy to move
- Single action set-up
- Comfortable, non-restrictive platform
- Complies with Australian Standard

Complies with Australian Standard for Portable ladders
 ASNZS 1892.3 1996 150 kg rating.
 We know through testing that the FPS range will exceed
 ANSI-ASC A14.5-2007 – 300lb rating
 but we do not officially rate them

STEP PLATFORM ACCESSORIES	Part Number	Description
	# RS	Stainless Steel Retractable Safety Rail fully encloses the platform, an important accessory not available from competitors. A Risk assessment may identify that you can inadvertently step backwards off the platform and fall. The Rear safety rail controls this risk. We recommend its use for platforms above 2.0m
	FSS	Stainless Steel Split Front Rail for egress onto fixed platforms, truck trays etc
	# CC	Stainless Steel Lever Actuated Castors - Set of 4 for easy maneuverability. The default position of the castors is up. Pulling the lever actuates the castor down allowing the castor to roll.
		Aluminum Leveling Legs for use on uneven ground. Detachable leveling legs are now available to suit the range of platforms. Not suitable for Underground Mining Applications
