

TCG-CI-1000 - Cement Industry Access Gangway

The cement industry can be an extremely tough environment for access equipment. We have addressed the issues.

Our most versatile cement gangway accommodates height variations in most hopper trucks. Sealed bearings designed specifically for the cement industry provide longer life, low maintenance, and yet are easily replaced.

**Built Specifically to
Meet Cement Industry Issues**

Features/Benefits

- Sealed bearings designed specifically for the cement industry provide longer life, low maintenance, and yet are easily replaced.
- Oversized handrail connections for longer service life.
- Massive pipe safety cage provides increased life, and fall prevention that can take a beating
- Exceeds MSHA standards
- Available in aluminum or steel (galvanized, primed, mill, or painted).
Similar model available in all fiberglass and stainless steel.
- Can be modified to meet your needs

All prices/specifications subject to change without notice.

TCG-CI-1000 - Cement Industry Access Gangway

Cement Gangway Safety Cage

The number one safety issue for truck drivers is **mis-spotting of trucks**—our cement cage addresses this.

The Carbis Cement Gangway Safety Cage was specifically designed to help truck drivers access the hatch on their hopper truck safely. This unique design has two lift-up panels within the cage allowing the hopper trucks hatch to be opened or closed without having to lift the safety cage when a truck is mis-spotted.

When truck drivers mis-spots their truck at your facility do you think they repositions the truck or compromise their safety?

With the new Carbis Cement Cage a mis-spotted hopper truck can open or close its hatch without having to lift the the cage!

Features/Benefits

- The cage is off-set to prevent the gangway from interfering with the truck hatch.
- Massive pipe safety cage provides increased life, and fall prevention that can take a beating.
- Exceeds MSHA standards
- Aluminum construction—strong but lightweight
- Can be modified to meet your needs

Liability Notice

Did you know when a truck rolls onto you business property, you are held accountable for the safety of the individuals who load your goods into that hopper truck, regardless of for who, he or she works!
