# Swing Gate Fall Protection Equipment

**Help prevent personnel accidentally backing out of the opening.**

The Carbis spring gate is an effective low cost solution to a potentially fatal problem.

The swing gate opens only one way— away from the opening—for maximum safety. The swing gate is designed this way so personnel can not accidentally backout of the opening.

As will all Carbis equipment our swing gates meet and/or exceed ANSI / OSHA regulations as we interpret them.

Available on new gangways or can be retro fitted to existing Carbis gangways — Call for details.

OSHA compliant swings gates provide fall protection along the entire length of the loading rack while allowing access the full

## Swing Gate Benefits

**Spring loaded gate closes automatically to help prevent personnel inadvertently backing out of opening.**

All prices/specifications subject to change without notice.
