Accessories

Prefabricated Buildings

Custom & Standard Prefabricated Portable Steel Buildings. Regardless of your needs, Carbis can produce a building to fit your budget. Both functional & attractive, our standard models fit most applications. We offer, a myriad of available options, (including Explosion-Proof, ADA-compliant, built in restrooms, & bullet resistant designs), to create a more workable unit.

Hose Handlers

Constructed from long-lasting hot dipped galvanized steel. Units can accommodate a 6' to 12' vehicle centerline. Hoses are positioned high enough to work with existing or new fall protection. A turning handle is used to easily position the boom with 360° of rotation, and a lock eliminates movement after positioning. Available in 4"/150 lb. or 6"/300 lb. capacity. Both fixed and winch operated hose handlers are available. Easily attached using u-bolts.

Tool Boxes

Helps eliminate tripping hazards
 Mounts to existing platform handrail
 Store tools, fittings, valves, and adapters
 Hot dipped galvanized steel
 Optional hinged lid for weather protection

Hose Support Racks

Two (2) designs available to mount to loading rack handrail or to ground
 Stores up to 4" hose
 Painted safety yellow
 Eliminates tripping hazards around loading areas
