

Spill Containment Pans

Uses

- Catch spills and drips while loading and unloading used in car storage areas

Vehicles Used On

- Tank Trucks
- Liquid Rail Cars

Features

- Systems include one center and two side pans tied together with a cross drain.
- Available in 10', 11', or 12' widths by 20' and 40' long. Additional custom sized pans are available to meet your needs.
- Pans may be placed end to end for continuous coverage.
- Pans are manufactured of heavy gauge carbon steel (standard). Galvanized and stainless steel or aluminum are available to meet your site requirements.
- Carbis' steel pans are stronger and more durable than fiberglass pans.
- All fasteners are stainless steel for maximum corrosion resistance.
- All gasket material is neoprene rubber unless otherwise specified.
- Stand-alone center pans are available for use in non-loading, staging, or storage locations.

Portable Pans

Portable pans are the perfect solution for protecting against drips and spills while loading or unloading tank trucks.
