# Truck and Railcar Mobile Access Platforms

## TC6 - Mobile Truck and Railcar Platforms

Portable versatile solution for tank truck and railcar access

The TC6 unit has a larger cage system on top and has a heavy duty base unit

**Vehicles used on:**

- Tank Cars
- Tank Trucks
- Hopper Cars
- Hopper Trucks
- Seatiners

**Uses:**

- Sampling
- Loading
- Inspection
- Unloading
- Venting
- Connect Hoses

**FEATURES:**

- Unique wheel design allows for a tighter turning radius and easier maneuvering to simplify spotting.
- Serrated decking on platform provides a self-cleaning, slip-resistant surface for improved safety.
- Can be used on a wide range of vehicles.
- Can be modified to meet your requirements.
- Covered by Carbis' 2 Year Warranty.
- Tow bar allows for easy moving or repositioning.
- 225 kg load capacity.

**# TC6-14**

**# TC6-14-ISO** (Larger cage on top to accommodate both Iso-containers and tank trucks)

**OPTIONS:**

Please see page 3 for Free standing Model

**Tank Car Platforms**

500mm wide by 120mm long platform with handrail fall protection is standard for accessing most tank car crashbox openings.

**Wheel Brakes**

The optional wheel brake can be used as an alternative to the corner jacks as long as the unit is being positioned on a level surface

**Forklift Tubes**

If you prefer to transport the TC6 using a forklift truck, then optional fork tubes can be attached to the base to help facilitate this operation
