the video

- For elevating and tipping wheeled bins into industrial skips or bins.
- Safe Vertical-lift: Bin does not swing out in dangerous arc. (To 6 metre lift)
- Total footprint: 940mm x 1190mm. (Dependant upon size/shape of container to be lifted)
- Standard lift to 250kg: (Custom built to 750kgs)
- Easy to manoeuvre: Heavy duty castors and safety brakes included. (Bolt-down option available)
- One person operation.

'Wide Series' **Dumpmasters** employ the same efficient tipping geometry as the well-proven 'Standard Series' machines. They are available with cradles to suit a range of larger bins, including 660l, 1000/1100l wheelie bins, or square and rectangular bins. Attachments are available to enable multiple bin sizes to be tipped, for example a cradle for tipping 1100l bins can be fitted with auxiliary catches to enable all standard wheelie bins from 80 litres up to 660 litres to be tipped as well. No adjustment is required for tipping the different sizes – simply wheel the bin in and empty

The **DM-700** pulls the front of the bin forward as the cradle is lifted thereby inverting the bin to empty into a skip located below the dock, or to safely empty the contents down a chute. Specially designed 'feet' located behind the front castors prevent the DM-700 from being pushed over the edge of the dock or down the chute: the machine can be easily pulled back onto the dock by one person.

Custom Bin

1500mm tipping height, 660l bin

Standard Inclusion:

- 240 litre Wheelie-bin Lift Cradle
- 100 mm Castors (2 with brakes)
- Full Safety Caging (Hot-dipped Galvanised mesh or PET-G)
- Metal Door-catch • Waterproofed
- Electronic Door-interlock Switch
- Key Switch

Cradle Option:

- Dual 120/240 Litre Cradle _____
- To suit specified containers such as round drums (200L), 660 & 1000L bins, bags, rectangular tubs, Brute containers, specialised containers etc. POA
- Multiple cradles eg. 240/660L bins, 120/240/660/1000 bins _____ POA
- Inter-changeable cradles _____ POA

Mounting Options:

- Pneumatic Wheels _____ POA
- Bolt-down Lugs _____ POA

Caging Options: (additional caging can be retro-fitted later)

- Full or Partial Stainless Steel _____ POA
- Side Guarding Only _____ POA

Power Source Options:

- Gel Cell Battery (included in cost)
- Single phase
- 3-phase

Other:

- Semi-automatic Controls (Single phase & 3-phase machines only) _____ POA
- Controls on both sides _____ POA
