

# StrongArm FlexiLifters

## for Gas Bottle Transport and Placement

Wheel up to Gas Bottle and attach to cradle using cradle strap.

Lay unit flat, release FlexiLift latch and allow cradle to rise on gas struts to horizontal position.

Position FlexiLifter adjacent to forklift, lock castors, undo bottle strap & slide gas bottle into position onto forklift.

### Converts from hand truck to trolley in seconds

A truly unique and innovative materials handling solution. The Flexi-lifter trolley operates as a conventional hand truck to lever goods on and manoeuvre, but can be placed down on all fours and extended upwards in to a trolley, with gas springs aiding the lift.

Code	Description	
FL10030F	Flexi-Lifter 100 complete with Forklift Gas Bottle Cradle (has additional bottle extension) - Shipping: Flat Pack 1550x650x600mm, 40 kg	
FL10030D	Flexi-Lifter 100 complete with Flat Steel Deck

FL10030S-GCYL	Flexi-Lifter 100 complete with G-Cylinder Bottle Cradle (BHP)	

All prices ex Spacepac F.O.B.

Constructed from high strength galvanised and powder coated tubing, so it's non-rusting. Uses Fallshaw quality wheels and castors for easiest rolling.

The Flexi-lifter eliminates an unsafe manual 'crane lift', by allowing the user to lever the goods on to the toe of the lifter (when in the hand truck mode), and then lower the trolley on to all four wheels. The load is then lifted using a safe squat-lift using the assistance of gas springs.

Twisting and manoeuvring of the trunk and lumber spine is eliminated when loading or unloading from the horizontal platform. If the load is more than 30kg it is desirable that two people slide the load off the deck.

The Flexi-lifter is having a large influence on safe work practices and increased productivity.

Other models available for office and courier applications.

See our Bottlechock & Gas Cabinet Brochures for safe carriage of Gas bottles on open and in enclosed vehicles.
