

Replaces all previous versions

Effective 1st February 2006

Release Pumps- For most plastic and Metal Drums up to 200 L

The Release Pump is a spill-free portable pump which represents a totally new concept for the safe, easy and cost effective handling of containerised liquids.

SELECT A PUMP COLOUR CODING

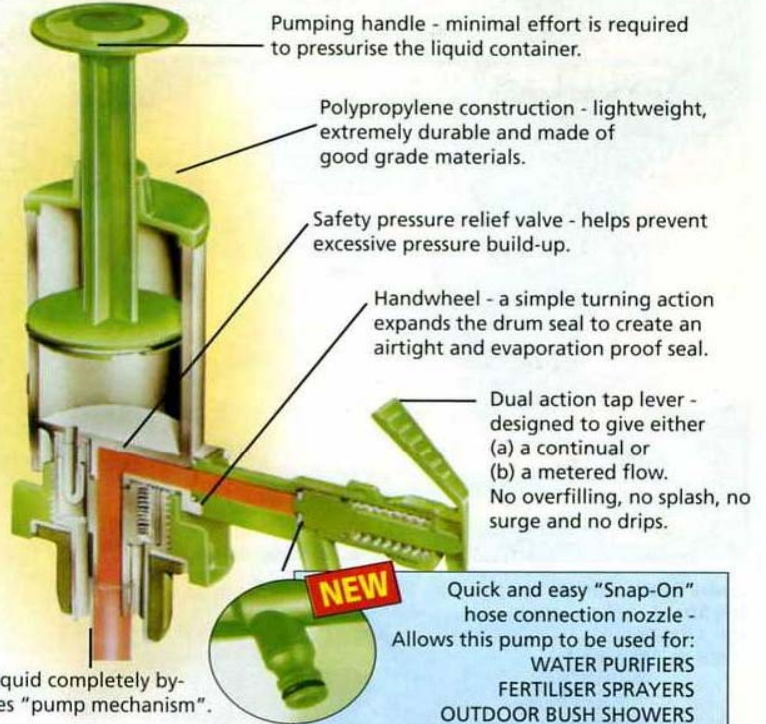

Release Pump is colour coded in three colours: red, Blue and Green. The pump body is standard to all pumps, made from robust polypropylene construction using 316 stainless steel screws. Different materials are used for the pump seals, O-rings and washers. The various rubbers used have a specific resistance to a wide range of liquids and chemicals.

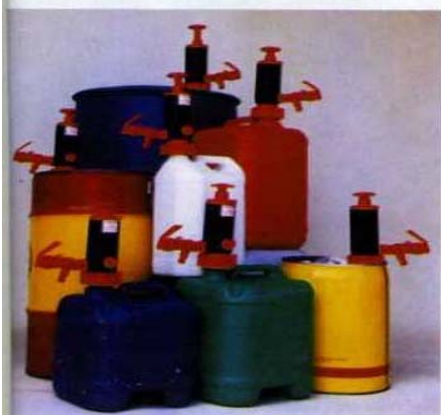

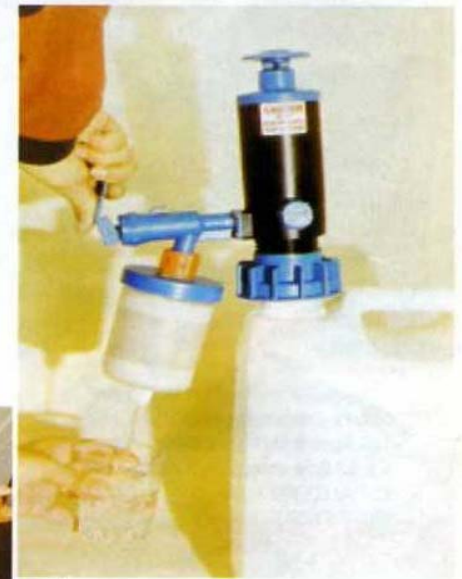

RED Release Pump - Nitrile seals for oils and chemicals.

BLUE Release Pump - E.P.D.M. seals for water based liquids and food grade products

GREEN Release Pump - Viton seals for special and aggressive chemicals.

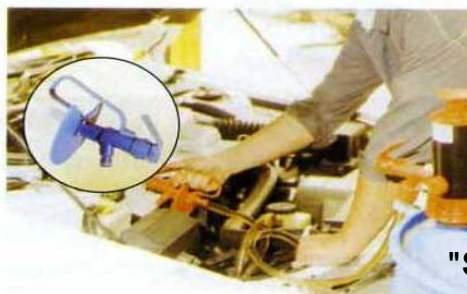

Part Number	Description
