ENTRANCE MATTING - VERY HIGH TRAFFIC

The type of mat installed in entrances to public buildings varies according to the type of traffic, the use of the building, the environment in which the building is situated and many other factors.

Traffic frequency can vary from hundreds to many thousands of feet a day, abrasive dirt may be walked in, wet weather may cause problems. The heavier the traffic the better the quality of entrance mat installed. But with mat fibre weight varying from 18oz to 59oz per sq yard and mat backing varying as well, decision making, in the face of these variables, can be difficult. Expert advice is the best way to choose the right mat.

WHERE TO USE

Wherever entrance mats take a real beating from very heavy traffic... Shopping centres, public buildings, office blocks, banks, hospitals, airports.

Hydrasorb - Charcoal

- The real heavy duty matting
- Heavy duty 59oz carpet fibre - up to three times the weight of other matting - takes really heavy traffic for years.
- Heavy duty edging - twice the weight of regular edging yet trolleys ride up with ease. Reduces hacking, cracking, or splitting of edges
- Slip resistant gripper back increases safety
- Absorbs and holds huge amounts of water on wet days yet dries quickly
- Cut to any width shape or size... or recess
- **10mm Thickness**

Part Number	Dimension (Width x Length)	Qty Pk		
# SPMSN215CL-CHA	2m x 15m Roll	1		
# SPMSNCUCL-CHA	2m Wide Cut to Length	1		

Custom made mats to any size

Stripe - Vinyl Backed - Charcoal

- Highly attractive new diagonal stripe design for that different, contemporary look
- Heavy 41 oz fibre weight takes punishing traffic and keeps looking good.
- Tough vinyl backing stops mat distortion.
- High water holding capacity for wet weather application
- UV Resistant for outdoor use
- **10mm Thickness**
