THE COMPLETE SYSTEM - ESTABLISHED FOR OVER 30 YEARS

Specialising in large documents, charts, maps, posters, film and artwork storage.

A Simple System - Multiplan has developed a simple and unique system to hang documents and other articles. The system hangs each sheet individually on a self adhesive polyester strip from a triangular bar. Multiplan also manufactures an extensive range of heavy duty job bags for storing group drawings, artwork etc. which integrates into the system.

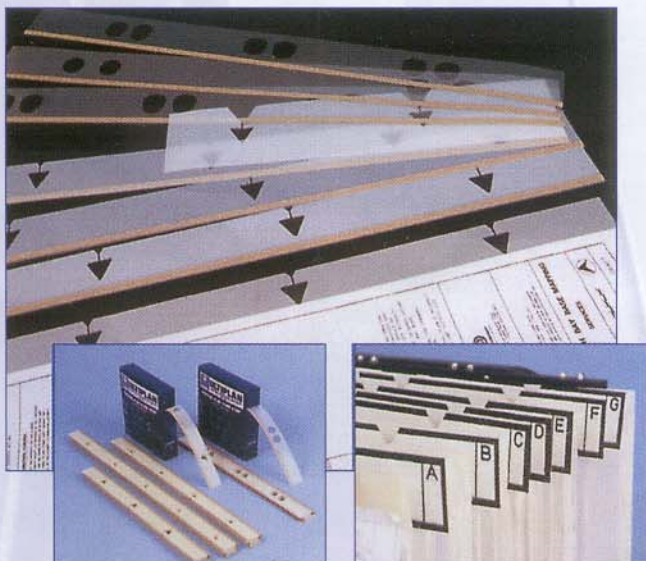

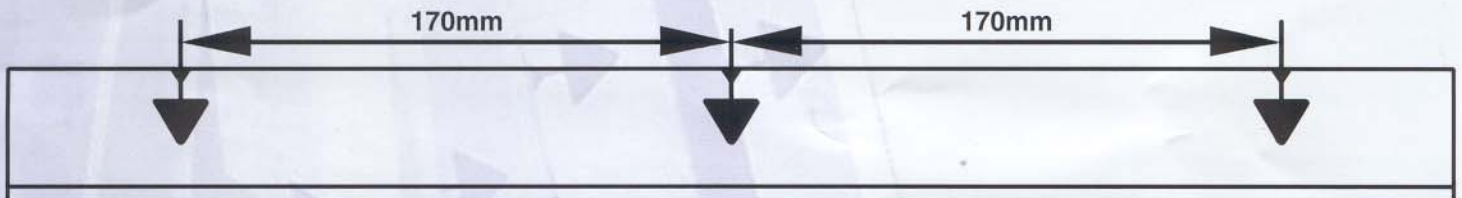

All Sheet Sizes Align to One Index Point - Using the Multiplan System, every sheet, irrespective of size, lines up to **one reference point**. This indexing point is always located on the right hand side of the document. When you need a document, you need only look along the indexing point to access any item.

Intermingle Associated Articles - The Multiplan System is extremely flexible, you can file different sized documents with other articles such as folders, artwork, film etc. and they will all intermingle and be easily accessible.

Instant Access & Retrieval - Simple snap in, snap out action with full visual access for browsing. This eliminates unnecessary handling of documents.

SELF ADHESIVE STRIPS

• Dividers not printed

- Manufactured from industrial strength polyester, our Suspension Strips can carry heavy loads. They will not tear or become brittle with age.
- Available in different thicknesses to carry various loads from light film through to heavily laminated posters.
- Available in cut length packets of 100 and 1,000 strips and also in 100 metre roll form.
- Multiplan also manufactures a wide variety of strip formats, including different punching patterns, lengths and distance between holes to suit other filing systems, just ask us.

INDEX DIVIDERS

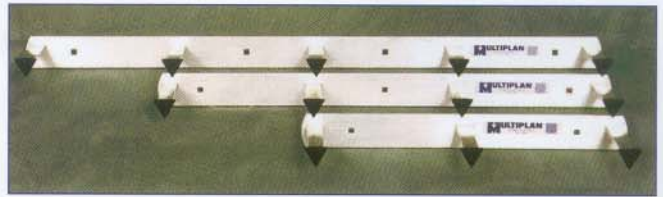

- Designed to project both forward and upward to enable quick identification of subject groupings. Supplied in packets of 10.

ALL SHEET SIZES ALIGN TO ONE INDEX POINT

INDIVIDUAL DOCUMENT FILING & JOB BAG STORAGE

WALL UNITS

- Economical, low and high volume storage unit.
- Wall units are available in all size requirements (A4 to A0).
- Capacity to store 100 individual documents or 30 job bags.

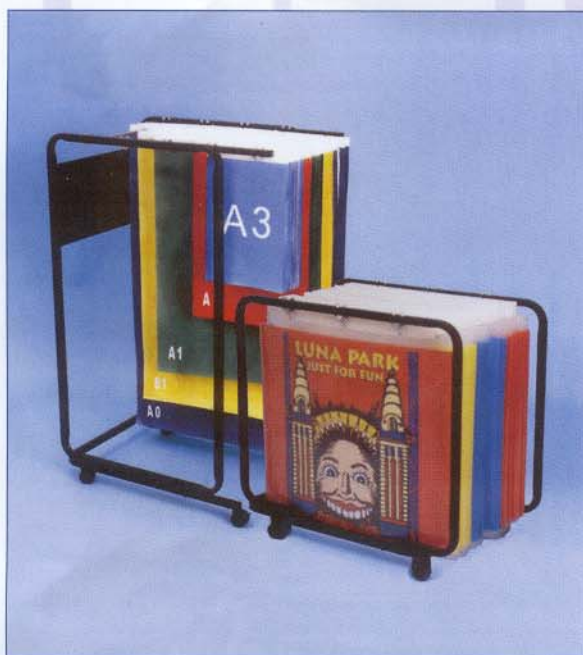

JOB BAGS

- Manufactured from industrial strength polythene, our bags easily carry loads of up to 10 kilos. Bags are clear so contents are easily viewed. Ideal in libraries for big book storage.
- Heavy duty polyester strips are eyeletted onto the bag for maximum strength.
- Three different types of pockets are available. Top Opening, Open Sided and Side Sealable, in many varying sizes.
- Used for a multitude of functions. Any item can be stored and integrated into the system.

MOBILE STORAGE UNITS

- Constructed for strength and mobility and finished in Satin Black scratch resistant powdercoat enamel.
- Fitted with locking castors and supplied in kit form for self assembly using tools and instructions provided.
- Stand design allows clear access to sheets as there is no obstruction to the front of the unit, eliminating possible document damage.
- Two tier mobiles, for high density small document filing, and other mobiles are also available (not featured here).

STANDARD MOBILE

- Capacity to store in excess of 1,000 documents or 125 job bags. In one half of a square metre of floor space.
- This unit can be adjusted to two heights and is available in three models to suit documents up to A0 size.

DIMENSIONS A4 to A0 - 1325mm H x 590mm W x 920mm D
A4 to B1 - 1325mm H x 590mm W x 835mm D
A4 to A1 - 1025mm H x 590mm W x 700mm D

UNDER BENCH MOBILE

- Specially designed for A4 through to A2 filing. This unit is ideal for artwork bag storage in the Graphic Design office.
- This unit can be conveniently stored under a desk when floor space is a problem.
- Capacity to store in excess of 600 sheets or 60 job bags.

DIMENSIONS A4 to A2 - 670mm H x 400mm W x 700mm D

PLAN FILING SOLUTIONS

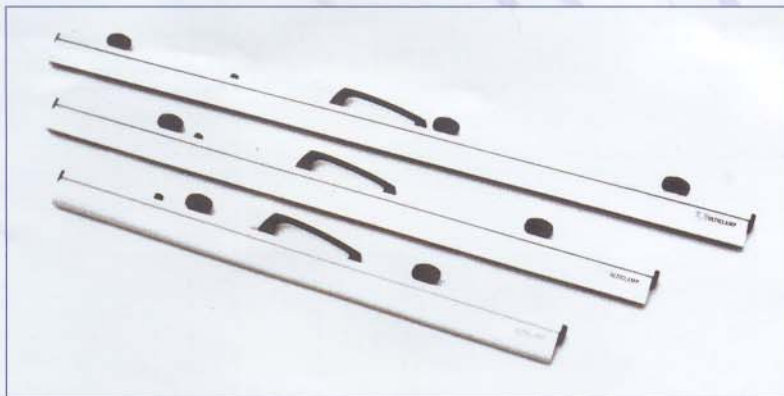

THE MULTICLAMP BINDER

The Multiclamp binder is an extremely strong, lightweight two-part aluminium clamp with a patented channel feature. Our premium binder can clamp sheets of any size securely within the one set of drawings without creasing, crimping or slippage.

FEATURES

- **Adjustable** - The Multiclamp channel design allows the handle and stop to be moved to any position along the channel. This feature permits the clamp to be adapted to most existing front loading clamp storage systems.
- **Strength** - All parts are of heavy duty reinforced material and are guaranteed not to strip or break under normal use.
- **Channel** - All heavy duty parts are captured within the channel. This eliminates any possibility of the clamp accidentally dismantling when the wing nuts are unwound excessively.
- **Indexing Label** - Black label holders are standard on all clamps.

SIZES & CAPACITY

- Each clamp has a 25mm (1") opening capacity and will hold over 100 sheets.
- Available in silver anodised aluminium.
- Available in four sizes:-
A0 - 950mm (37.5")
B1 - 800mm (31.5")
A1 - 650mm (25.5")
A2 - 500mm (19.5")

MULTICLAMP WALL MOUNT

Wall mounted binder storage units are an economical form of clamp storage. This unit saves valuable floor space and will hold sheets of any length.

Holds clamps of any size and can be used for either left or right handed binder access, or both. This feature is great to separate categories.

Finished in Satin Black scratch resistant powdercoat enamel. Two sizes available - 5 or 10 clamp capacity.

DIMENSIONS 145mm W x 275mm D

BINDER STORAGE SYSTEMS

MULTICLAMP MOBILES

Frames are constructed for strength and mobility and will not bow, even under the heaviest of loads. Finished in Satin black scratch resistant powdercoat enamel.

Stand design allows clear access to documents as there is no obstruction to the front of the unit, eliminating possible document damage.

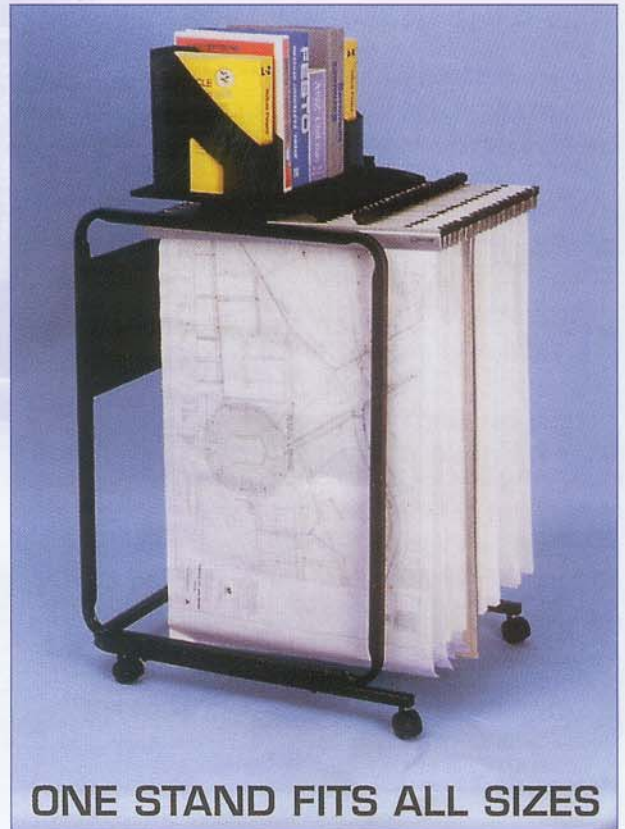

Mobiles are supplied in kit form for self assembly using the one simple tool and instructions provided.

FEATURES

- **One Stand fits all Sizes** - Any size and most brands of clamp can be stored.
- **Height Adjustable** - This unit can be adjusted to two heights to suit customer requirements (see below).
- **System Shelf** - Standard on all mobiles and offers additional storage capacity for associated files.
- **Locking Castors** - Standard on all units.

DIMENSIONS

- A0/B1 - 1370mm H x 590mm W
- A1/A2 - 1070mm H x 590mm W

ONE STAND FITS ALL SIZES

• Two-tier mobiles also available for A2 and A3 CAD generated drawings

CAPACITY: 20 Clamps of any size (2,000 Sheets)
