FOODSERVICE: Insulated Products

CaterMax Insulated Carriers (Cat_07 Page 26)

Preserve food quality – and your reputation – with Rubbermaid® CaterMax™ Insulated Carriers.

When hot or cold foods aren't kept at safe temperatures, quality and freshness are quickly lost while the potential risk of harmful bacteria growth rapidly increases. Your catering operation cannot afford to stake its reputation on unreliable food transport equipment. Rubbermaid® CaterMax™ Insulated Carriers can help preserve the quality of your operation. Featuring innovative thermal insulation and lid-sealing designs, these durable and attractive pan carriers keep hot foods hot and cold foods cold for hours. They're easy to handle and efficient to stack and store. Plus, they're an attractive value compared to other conventional food pan carriers.

Fits Rubbermaid® Caterer's Triple™ Trolley (#4401-86) for easy transport.

Advanced sealing system.

Specially designed serpentine seal helps retain temperature without using unreliable gaskets that can wear out and harbor harmful bacteria.

Upscale design.

Stylized design reflects a fresh, professional appearance in any catering situation. Highly durable structural-web plastic resists marks, dents and scratches; all-smooth surfaces are easy to clean.

Smooth plastic surfaces clean easily resist dents and scratches.

Systematic food transport & storage.

Rubbermaid® CaterMax™ Insulated Carriers work systematically with Rubbermaid® Ma: System™ Racks, Carts and Rubbermaid® X-tra™ Food Pans and Soft Sealing Lids.

Easy, reliable hardware.

Rubbermaid® CaterMax™ Insulated Carriers feature durable plastic hardware that's easy to latch and carry.
