# EZEE Trolley:- Library

Logan City Council Libraries in Queensland have invested in EZEE Trolleys to make visits to their libraries more pleasant and comfortable for clients. For some clients this means no more struggling to carry heavy books. "For some time now we have been looking for something like this that is quiet, compact and easy to move around. We are very happy with our decision to buy EZEE Trolleys. Clients and staff are very impressed with them. They are ideal for older clients as well as for replenishing shelves".

Our Special Thanks go to the management of Logan City Council Libraries for kindly acting as a reference to convey the benefits of EZEE trolleys to other libraries across Australia. Our thanks also go to the management of Wollongong City Library in NSW for their kind permission to take photographs in one of their branches. Please contact us if you would like more info or would like to place an order.

For larger purchases we also offer attractive Rental Options whereby your capital is conserved, there is no residual debt, the equipment is off balance sheet and you have operating expense allocation. Please contact us for more information.
