Effective 12th April 2007

EZEE Market Trolleys

EZEE Trolley (Patents Pending) is the most versatile, strong and compact nesting basket trolley that is available in the market. It nests in the back of stores and attracts basket shoppers to double up to 2 baskets. It is the only trolley in its class that can effectively be used with or without baskets.

With customer education and a planned implementation, the concept will achieve a far higher degree of success than it will -without planning and customer education.

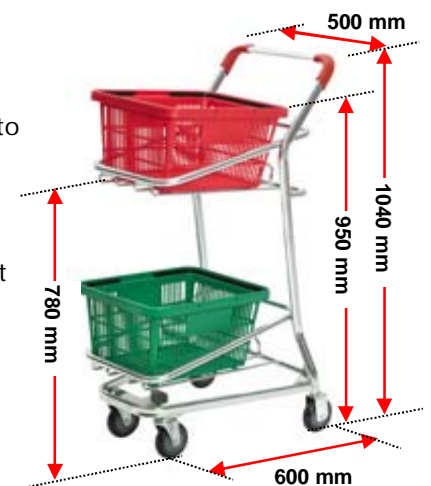

Great in and out of tight corners. Click here to see more retail applications. EZEE Trolleys are kinder to customer's backs because they encourage people to bend their knees.

Make customers more comfortable and allow them to buy more without straining themselves.

To address this, we provide signage to educate customers. We also offer initial in-store customer education promotions and a managed roll out plan to ensure a 100% success rate.

For larger purchases we also offer attractive Rental Options whereby your capital is conserved, there is no residual debt, the equipment is off balance sheet and you have operating expense allocation. Please contact us for more information.

Also see our brochure on Larger supermarket trolleys

Note: Volume Pricing Available!! (minimum 50)
