

EXPANDING MOBILE BARRIER

Starting from an easy to move mobile, wheeled package with a **foot print just 600 x 330mm**, unhook the elasticised securing straps and this clever device grows to a **full 4m long**, seriously exclusive barrier.

Consisting of a series of **900mm high**, concertina, plastic panels in **bright easy-to-see yellow**, this barrier prevents access as no single signs or cones can.

This is a must for anyone who is serious about exclusion for safety.
Just grow this barrier to any length up to it's maximum and set down in a straight or curved configurations.
And it **weights under 15kg**.
