KB - COLLAPSIBLE BULK BINS

ENGINEERED FOR LONG LIFE, EASE OF USE AND MULTIPLE APPLICATIONS

- ➔ Easy to use, a single worker can assemble the container in less than a minute
- ➔ Kitbin panels are interchangeable and can be replaced one-at-a time if damage, cuts replacement and inventory costs,
- ➔ Removable wall provide easy access for loading and unloading, and improve ergonomics for pick and pull operations.
- ➔ Engineered from maintenance-free, high-impact resistant HDPE structural foam for the highest strength-to-weight ratio and easy handling
- ➔ Patented locking panel design provides strength near solid, one-piece units. Makes bin appropriate for applications involving loads up to 600 kg.
- ➔ Smooth surface for easy cleaning and product protection. No splinters, rust or paint chips to contaminate products.
- ➔ Extreme temperature resistance-temperatures from +60° C to - 40° C. Resistant UV degradation.
- ➔ Solid wall and vented wall options. Vented walls allow hydro cooling to prevent mold and bacteria growth.
- ➔ Four-way forklift entry
- ➔ Stackable: up to 6 units high.
- ➔ Completely recyclable
- ➔ Meets USDA standard for direct food contact in agricultural and food processing applications.
- ➔ Pallet can be used separately.

Illustrated - Groups of 5 knocked down bins for transport

AGRICULTURAL

INDUSTRIAL

Removable sidewalls
 Provide easier access,
 improved ergonomics for
 pick-and-pull operations.

KitBin easily handles
 up to 600 litres
 of materials

Easy assembly... by a single worker... in less than a minute

1. Insert side wall panels into pallet base

2. Align Sidewalls so that interlocking mechanisms can be engaged

Push extended locking post down to secure interlock mechanism.

3. Repeat steps 1 & 2 for other walls

To disassemble, press release latch and pull up on locking post.

Sidewall panels interlock into base to insure structural integrity.
