# G Series - Laptop Storage Trolley

## 16 Bay Laptop Storage Trolley

Ideal for education organisations. The 16 Bay Laptop Storage Trolley facilitates the storage and safe movement of multiple computers in a secure unit. Safety and convenience are key factors in the design of this trolley.

A new, Series II programmed, heavy duty controller is factory fitted into the charging bay. This eliminates the risk of heat build-up from excessive power usage. Strong, yet lightweight aluminium alloy construction for easy movement.

For added security, Spacepac offers the option of a unique "Docking Station" that enables the trolley to be locked in a central location. The trolley simply slides into the wall mounted heavy steel Station and is secured with a steel pin and padlock.
