## **DANGER BEWARE**

### **BEFORE CARRYING FLAMMABLE GASES IN ENCLOSED VEHICLES**

The liquefied Gases (Transport and Gas Transfer) regulations 1980 prohibited the transport of liquefied gases in enclosed vehicles.

Regulation 411 prohibits the transport of Liquefied Oxygen or Gases of class 2.1 or Class 2.3 in an enclosed vehicle or an enclosed compartment of a vehicle.

Exemption is provided for small packages on public transport (aerosols or the like) or for 10kg of LPG for personal use (BBQ gas bottles). The exemptions do not apply to tradesmen's equipment - in particular acetylene gas bottles.

If acetylene/LPG bottles are transported in a separate enclosed cargo compartment (such as Utility with canopy) then compartment must be vented.

If the cargo compartment is open to the passenger compartment (as in most open floor vans) the bottles must be housed in a separate, fixed, tightly closed compartment or cupboard, which is provided with, fixed open ventilation to the outside.

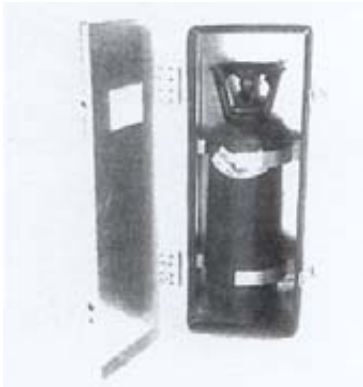

The particular explosive properties of acetylene/air mixtures are such that exemptions to the requirement are not permissible.

The Steel Cabinets manufactured by Spacepac Industries meet with the requirements of Regulation 411 (2) (c) of the dangerous Goods (Transport) Regulations 1987 for the transport and storage of gas cylinders, subject to installation requirements.

It is recommended that all users of steel Cabinets check their Insurance Policy covers regarding the above Regulations.

### **Other Models Available - See Our Website [www.spacepac.com.au](http://www.spacepac.com.au)**

#### **MODEL #SP707**

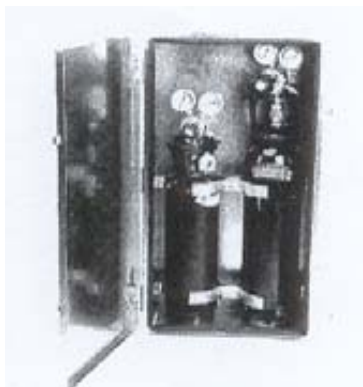

#### **STEEL GAS CYLINDER CABINETS**

- Height 690 mm, width 265mm, depth 260mm
- Suits 1 'D' size cylinder
- Heavy gauge Galvanized Steel construction
- All seams fully welded
- Adjustable toggle locks
- Rubber compression seal
- Ventilator tube supplied
- Unique cylinder holding brackets
- Doors hinged on left unless otherwise stated

Gas cylinders and accessories not included.

#### **MODEL #SP717**

#### **STEEL GAS CYLINDER CABINETS**

- Height 905mm, width 480mm, depth 265mm
- Suits 2 'D' size cylinder
- Heavy gauge Galvanized Steel construction
- All seams fully welded
- Adjustable toggle locks
- Rubber compression seal
- Ventilator tube supplied
- Unique cylinder holding brackets
- Doors hinged on left unless otherwise stated

Gas cylinders and accessories not included.

**Boxes inspected by Department of Labour and Industry and comply with regulation 411(2)**

All prices/specifications subject to change without notice.
