# PLUNGER CANS, BENCH CANS & SWAB PAILS

One-hand, single-motion depression of spring-mounted dasher quickly dispenses a measured quantity of flammable liquid to wiping cloth or swab.

Excess liquid drains back into can when dasher is released. A built-in perforated-metal flash arrester in the dasher cup protects against ignition of can contents, reduces noxious vapors and prevents costly evaporation losses. Models are available in a variety of sizes.

Touch-up cans, swab pails and bench cans have hinged covers that can be closed when not in use.

Part Number	Description	Capacity (Litre)	Dasher Size (mm)	Height (mm)	Overall Diameter (mm)	Test Lab Listing
