

## Ultra SpillDeck Bladder Systems®

Hidden Containment Bladder  
Automatically Unfurls To Capture  
Large Spills Or Drum Leaks

Ultra-SpillDeck Bladder Systems are low profile, polyethylene containment decks which meet EPA and Uniform Fire Code Spill Containment Regulations. Available in 1, 2 and 4-drum modules, the low 146 mm deck height allows safe and convenient drum loading, even without drum handling equipment. Add the optional polyethylene loading ramp for even greater handling ease.

### Ultra-SpillDeck P1 Bladder System

U.S. Patent No. 5,642,834; 5,007,557  
Canadian Patent No. 2,030,984

Part# 1320

Small spills and leaks are captured in the 41 litre sump.

Large, catastrophic leaks flow into the bladder through a bulkhead fitting. Protective "trap door" opens automatically to allow bladder to unfurl.

Rugged, double layer polyethylene bladder allows 249 litres total containment.

- Compact 657 x 774 mm footprint saves valuable floor space — perfect for single-drum waste collection usage.
- **The first and only low profile, single-drum containment unit which meets SPCC, EPA Container Storage Regulation 40 CFR 264.175 and Uniform Fire Code Spill Containment Regulations.**

Part# 2317

Polyethylene bladder is housed inside the Bladder Attachment. Connect the Bladder Attachment to the SpillDeck in seconds — no tools required!

Part# 2329

### Ultra-SpillDeck P2 Bladder System

- Store 2 drums on the all-polyethylene, space-saving 657 x 1320 mm SpillDeck P2 Bladder System.
- Low 146 mm deck height is the same as wooden pallets — allows drums to be "jockeyed" onto SpillDeck Systems when standard drum handling equipment is not available.
- Applications include satellite waste collection, drum pump stations and storage of virgin chemicals.
- **Meet SPCC, EPA Container Storage Regulation 40 CFR 264.175 and Uniform Fire Code Spill Containment Regulations.**

## Ultra-SpillDeck P4 Bladder System

- Use the 4-drum SpillDeck Bladder System in place of taller containment pallets — low 146 mm deck height offers significant safety and handling benefits.
- Overspills and small leaks are captured in the 166 litre sump; catastrophic leaks deploy the bladder, allowing the 4-drum system to meet regulations.
- Applications include satellite waste collection, drum dispensing, storage of virgin chemicals and hazardous wastes.
- **Meet SPCC, EPA Container Storage Regulation 40 CFR 264.175 and Uniform Fire Code Spill Containment Regulations.**

- Use optional bulkhead fittings to connect 1, 2 or 4-drum SpillDeck modules together. A virtually unlimited number of custom configurations can be designed to meet your specific needs.
- SpillDeck configurations which accommodate 6 or more 208 litre drums do not require usage of the Bladder Attachment to meet SPCC, EPA and Uniform Fire Code Regulations. Any 6-drum configuration, when connected with optional bulkhead fittings, will have a 249 litre sump capacity without a Bladder Attachment.
- SpillDeck Bladder Systems require adequate aisle space to allow the Bladder to unfurl properly.
