

## Small Rainwater Tanks

### SMALL TANKS (UP TO 5,000 LITRES)

#### **NEW** 4000 litre tank fits traditional 1000 gallon tank stands!

#### Features

- Manufactured from UV stabilised polyethylene, **Rapid Plas** tanks are tough and durable and able to withstand the harsh Australian sun
- Traditional corrugated design provides added strength and attractive appearance
- **Rapid Plas** tanks do not rust or corrode, are impact resistant and long lasting
- Guaranteed one-piece tank construction ensures long term structural strength
- Food grade polyethylene is used giving you fibre, taste and odour free drinking water
- Unique roof support system eliminates the need for a centre pole

#### All tanks supplied with...

- Inlet Strainer (can be purchased separately)
- BSP outlets as per schedule
- Overflow - Supplied unfitted RT00500 - RT27000
- Taps supplied with smaller tanks (see schedule)

All tanks will be supplied with 2 x outlets as per standard positions except for the RT00500 which has 1 x 1" outlet opposite to the inlet.  
 Additional brass outlets are available as an option at extra cost- See page 13

#### Tank Manufacturing Standards:

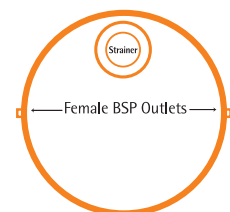

Rapid Plas tanks are manufactured from virgin food grade linear low density polyethylene complying with AS 2070:1999 (Plastics materials for food contact use) and AS 4020:2005 (Testing of products for use in contact with drinking water) as required by AS 4766:2006 (Polyethylene storage tanks for water and chemicals).

#### Rapid Plas tanks are backed up with a 20 year warranty

Polyethylene rainwater tanks ensure a reliable, safe and cost effective method of storing our most precious element - **water**

\* Please refer to page 3 for standard and special colour selections

**i** We do not remove the top of tanks for transport 

**i** The proven self supporting roof design for the larger tank sizes eliminates the need for a support pole. The unique internal truss design provides adequate roof support while not detracting from the tank's traditional look.

• No centre support pole

All tanks from RT01100LP upwards have moulded lifting lugs

**Rapid Plas** rainwater tanks are rotationally moulded as a 'one-piece' tank. At no stage is the roof removed and screwed back on. A carefully programmed manufacturing process ensures maximum wall thickness at the base - where it needs it most.
