

KF 2 STYLE SHELVING

This shelving is compatible with the shelf widths of the previous Lamson & Stortek KF2 Shelving

KF 2 STYLE SHELVING is a Modular Shelving System offering frame system configurations for flexible bay-size adjustment. The extreme versatility of this system makes it suitable for virtually any storage or warehouse application.

Pre-assembled support frames made from high-quality, galvanized steel are available in various heights for single-level and multi-tier constructions.

They are designed for fast assembly onsite.

The system offers complete flexibility with shelves being adjustable on 53mm pitch, the height of the mezzanine floor can be set to suit individual requirements, to incorporate sprinklers, air-conditioning, lighting and offices etc

Most Suitable for:

- Logistics and Transportation
- Automotive spare parts
- Light to medium weight small items such as files, small boxes, brochures etc.

► Bolt-free design for rapid assembly

bay lengths 994 and 1283 mm,
shelving depths 300, 400, 500, 600, and 800 mm,
variable heights for single- and multi-tier designs

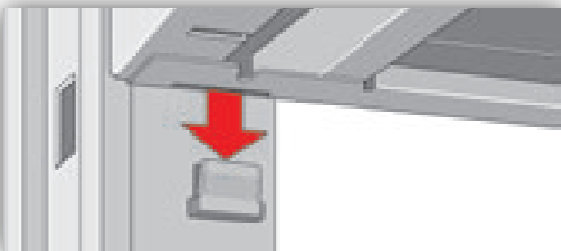

► Frame profiles with 53 mm lug spacing

► Total organization

with comprehensive accessories, such as shelves,
horizontal beams, timber shelves, walls, drawers and doors

► Capable of with standing loads of up to 5000 kg per bay

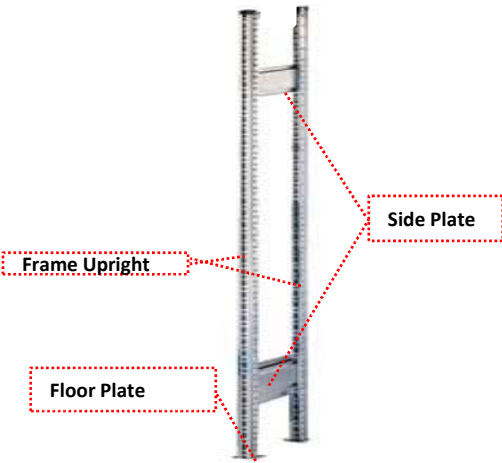

► Multi-tier installations can be added at a later date

the end section is firmly located against the upright post.
In conjunction with additional spot welding, this makes
the shelves particularly strong and resistant to twisting,
thus ensuring additional stability.

Replaces all previous versions

Effective 1st February 2008

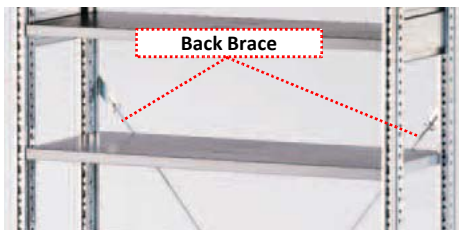

End Frame - Galvanized

End Frame Assembly Includes:

- Side Plate (2)
- Floor Plate
- Upright (Galvanize)
- Screws
