## NON POLLUTING BATTERY / ELECTRIC VEHICLE OPTIONS:

### # C4-32 MULE - Taylor Dunn; Suitable for indoor & outdoor operation

**Illustrated**  
# C4-32 Mule with optional  
Conditional Registration Kit

- Suitable for use in confined spaces.
- Supplied with safety strobe light and warning beeper
- Heavy-duty batteries, built-in fully-automatic chargers make sure these trucks are always ready to go.
- They are ideal for moving loads in warehousing, hospitals, schools, residential developments and other environments where quiet, fume free operation is necessary.
- Only 750mm wide, these compact trucks clear narrow aisles and standard doorways.
- Full 360° turns can be made in a mere 3.5 mtrs.
- Adjustable seat and all-steel construction ensure a comfortable, safe ride.
- Individually padded seat and backrest are covered with tough heavy-duty vinyl upholstery.
- Bumpers are heavy-duty steel welded to the frame; 16 gauge steel diamond plate facing covers exterior surfaces.

### Spacepac - JUMBO; suitable for indoor operation

**Jumbo** towing application  
with 660 litre bin

- Jumbo is pollution free, silent in operation and highly manoeuvrable, with a generous 1200 kg towing capacity.
- Provides a unique, versatile turning radius of only 1310mm.
- This coupled with its top speed of 8 km/h, makes the jumbo both compact and efficient for daily operations in many environments.
- The new jumbo is standard with full safety features, flashing light, indicators, horn and hitching pin for towing.
- Operator ergonomics are a feature of this unit, with low step on and off chassis, hand throttle control and clear view stand up operation.
