# THE ImageLifter™ CASKET TROLLEY

## Designed specifically to convey coffins and caskets.

- Ideal for use in the chapel, crematoria and for viewing the deceased, this sturdy trolley is the best on the market and simply cannot be compared with regular church trucks.
- This trolley is the practical answer for funeral directors combining funeral industry OHS&W requirements, practicality, durability, aesthetics and labour cost savings.
- It makes good business and financial sense to protect your staff from heavy lifting & injuries. In 2003/2004 over 93% of compensation claims were accepted. (Statistical Review SafeWork SA, previously WorkCover Corporation SA).

"Staff in the funeral industry carry, pull and lift weights far in excess of the regulated OHS&W standards of 25kg, and with the growing trend of increased weights of the deceased & oversized coffins the task is becoming more strenuous & requires additional staff."

Touch button height adjustment

Lockable Rollers for easy slide

## Why This Trolley is so Effective

- **Touch button height adjustment :**  
Loaded or unloaded the quiet, smooth –gliding, linear actuated operation means that the coffin or casket can be effortlessly aligned to any height for transfers to a hearse, preparation area or for conducting viewings.
- **No more heavy dragging or lifting:**  
Lockable rollers allow the casket to be slid smoothly and effortlessly to the Hearse, Bier, Cataphalque or preparation surface.
- **Sturdy, yet light weight:**  
The entire unit weighs only 65KG with solid heavy duty 125mm directional castors for easy maneuverability.
