

OP Range - Diva Litter Bin - Street Furnishing

The Diva Street Litter Bin is manufactured by high molecular polyethylene, compact injection moulding process, guarantees a long service life, is stabilized against UV rays and due to its characteristic material properties is extremely robust, frost and chemical resistant

Cigarettes can be extinguished on the optional metal plate without damaging the bin

Mix & Match colours to optimise aesthetic value and compliment surrounding.

Emptying - also by interchanging method - is carried out by simply unlocking with a universal key.

The stability of the DIVA container was increased by optimising the shape and the thickness of the bin walls.
