Please Note: Images featured in this catalogue are not to scale.
Dimensions are nominal (tolerances of up to + +- $1 \%$ should be anticipated).
For more detailed information on any of the products featured, specification sheet are available upon request
jection Moulded Materials: All products are manufactured from either polypropylene (temperature range of $-0^{\circ} \mathrm{C}$ to $+130^{\circ} \mathrm{C}$ ) or high density polyethylene (temperature range $-20^{\circ} \mathrm{C}$ to $+100^{\circ} \mathrm{C}$ ). The above temperature performance limits are dependent upon appication, product design and top toad requirements.

Rotationally Moulded Materials: All products manufactured by rotational moulding from high density polyethylene have a lemperature range of $-18^{\circ} \mathrm{C}$ to $+65^{\circ} \mathrm{C}$. The above temperature performance limits are dependent upon application, product design and top load requirements.

## $\square \square$ AUTOMOTIVE crates

## MULTISTAKA crates $\square \square \square$

Don't be fooled by inferior imports. Designed originally to meet the needs of the automotive industry, this family of strong and rugged containers are used for handling components in a wide range of heavy manufacturing and assembly line situations.
All products are pallet compatible and special reinforcing columns allow them to be stacked when full. The base is als strengthened to withstand the punishment so often metered out by conveying systems and a special design feature strengthened to withstand the punishment so often metered out by conveying systems and a special design feature lifting. This range is made from tough durable polypropylene and is UV resistant - this adds up to a long service life in tough industrial environments.

## NALLYENVIRO™ crates ■

Bakery - The handling of large quantities of freshly baked breads, rolls and confections can be challenging The solution is a lightweight plastic tray that can carry bulky loads, that can stack without damaging the contents and that lets the product packaging show through. Trays must also accommodate automated handling equipment and hand-truck delivery. And when empty, they must nest to minimise the amount of storage space required The trays must have smooth surfaces, which are easy to clean with no rough edges that can tear packaging They must be attractive enough to encourage purchases right out of the tray.
The ideal source for such trays is Nally Plastics. With many years of experience Viscount has supplied the bakery industry and has a range of rolls trays, bread trays and multi-level trays to meet your needs.

## $\square \square$ PRODUCE crates SPAC

Traditionally Nally's range of crates to this industry has been known as produce crates.
Produce can also be classified as agriculture and/or horticulture and is an important market in the Australian supply chain.
Our services this industry with many types of crates including the returnable folding transit crates, swingbar style crates, Stakanesta crates and bulk handling bins through to seedling trays. (For information on Bulk Handling range just ask for a Bulk Handling Catalogue.)

Whether it be picking mangos or displaying the product to consumers, we has a diverse range of products that fall into this category.
We have a plastic crate system that will work with your produce, agricultural and horticultural needs.

## ■■ - RFC crates <br> SPACEPAC

## AQUACULTURE crates ■ ■ ■

This family of crates RFC (Returnable Folding Crates) has been created for ultimate shipping \& storage. They allow businesses to drop the old cardboard habit \& become sophisticated in their supply chain solutions,

Rigid when loaded \& stacked, these crates quickly fold inwards when empty. This design sets a new standard for stacking strength in a reusable collapsible container.

Available in four different heights, these crates can be used for any type of product or material handling application. Each crate has the same footprint folded or loaded thereby conserving valuable storage space. These returnable totes are ergonomically designed for manual operations, easy to assemble \& disassemble \& work equally well in fully automated systems,

Product Features:

- Ergonomically designed bevelled hand holds
- Knock-down quick release latches
- Rigid vertical sidewalls
- Australian footprint
- Branding \& RFID facility
- Smooth interior \& dimpled exterior
