DRUM TROLLEYS AND TRUCKS

Multi Purpose Drum Trolley

The Multi Purpose Drum Trolley is very easy to load due to its swing axle, which moves the load centre back as you tilt the drum until it comes to rest on four wheels.

By pushing down on the handles, the MPDT turns into a drum stand to decant the drum's contents.

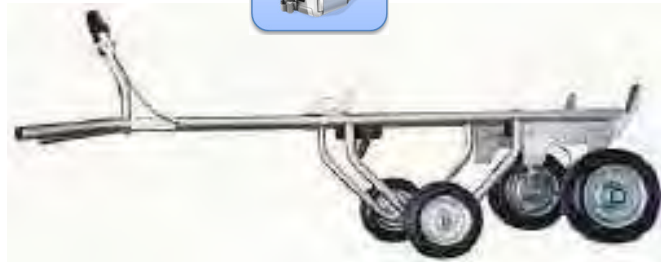

Internal wheels allow the drum to rotate in the stand to prevent leaks or to place the bung in the correct position.

MPDT

Shipping Size 600x700x1550mm - 35kg

Stainless Steel Drum Dispensing Cradle

The STS Cradles offer a safe effortless way to turn 200 litre drums and barrels from the vertical to the horizontal.

The DCR01 Dispensing Cradle is ideal for decanting 200 litre drums and barrels; braked castors and handle storage in the base prevents the cradle from tipping.

There is an option to have rollers fitted, which allows the drum to be turned around when horizontal.
