IBC Spare Parts

MX

ECOBULK MX

SCHÜTZ
INDUSTRIAL PACKAGING

The ECOBULK MX offers the greatest possible volume in the minimum of space.

The IBC system is designed for the safe transport of hazardous goods up to the specific weight of 1.9. Quick to fill, easy to stack, easy to load.

**Non Replaceable
Welded to Original Inner Tank**

The outlet valves from **SCHÜTZ**.

**integrated
butterfly valve DN 50**

User-oriented outlet valves ensure safe and precise control of discharging filling goods of various viscosities. A large selection of sealing materials provide resistance to various fittings of most filling mediums.

In addition to environment-friendly production of transport containers the **SCHÜTZ TICKET SERVICE** significantly contributes to the conservation of resources and to the protection of natural foundations of life: by means of conserving raw materials our unique collection and reconditioning system relieves the strain on our environment in a sustainable way.

Replaceable Valves
