WHEELCHAIR Mover™

Can your staff move a 550/750 pound patient and wheelchair across a carpet or up ramps smoothly, safely and effortlessly?

Introducing the Dane WheelChair Mover– the industry’s first power-assist device making patient wheelchair transport safe, smooth and easy. Designed by hospital safety experts for use by hospital personnel, the Dane WheelChair Mover fits all standard wheelchair sizes and models in your facility, easily transporting patients safely and securely around hallways, in elevators, and up and down ramps while reducing potential injury or physical strain to personnel. The WheelChair Mover’s quiet, smooth movement means a gentle ride while it’s maneuverability and ease of use means personnel move safely and efficiently. From the innovative minds at Dane Technologies comes another industry first, The WheelChair Mover.

Features

- Variable speed for patient transport comfort
- Positive wheelchair locking mechanism
- Compact design for maneuverability
- Easy to use controls with system status indicators
- Floor friendly non-marring solid rubber tires
- Automatic brake prevents rollback
- Charger interlock prevents drive away
- Charging cord with convenient storage area
