Liftmaster

Waste handling solutions

There will always be waste, and while we're getting better at separating our general waste, recycling and green waste into different types of bins, a growing population simply means more waste, which leads to more bins. More bins mean an increase in manual waste handling processes, like emptying them into industrial bins or skips.

While some workplaces previously allowed manual lifting of wheelie bins into skips, the rising costs of workplace injuries has led at least one state government department to direct that:

'Wheelie bins are not to be manually lifted into industrial bins... If wheelie bins are to be emptied into an industrial bin then an appropriate lifting device is to be provided.'

If your workplace still has a manual waste handling problem, it's time to find a solution from Liftmaster's range of Australian made full swing or lift-and-tilt bin lifters, which allow a single operator to lift and empty wheelie bins safely, whilst eliminating the risk of back and side strains caused by lifting heavy bins above shoulder height.

How to choose the right bin lifter

1 Determine the size and weight of your full wheelie bin and how often you'll be tipping

Our range of Australian made bin lifters have models that can lift 80, 120, 140 and 240 litre wheelie bins weighing anywhere from 30–250 kg safely, with assisted lift units that you can safely use up to twice a day, all the way to powered hydraulic units that can lift and tip all day long.

2 Determine how many times a day you'll be tipping

Assisted-lift bin lifters can safely lift their specified weights, but still require manual effort when tipping. So we recommend only using them between 2 and 10 times a day, per person, depending on the model you choose. If you need to tip more frequently, our powered bin lifters can lift heavier weights more often without the risk of muscle strains.

3 Determine the height of the dumper bin you'll be tipping into

The Niftylift full swing bin lifter and the Ecolift lift-and-tilt bin lifter is suitable for 1500 mm high skip bins. The rest of the range can be configured for use with either 1500 or 1800 mm high skip bins.

4 Determine the work area and space requirements of the bin lifter

Because of the path of the swing action, full swing bin lifters are only recommended for use in a controlled environment where pedestrian access is restricted. For areas such as schools, retail centres, or anywhere where pedestrian access cannot be restricted, we recommend using a lift-and-tilt model, which encloses the lifting motion within the bin lifter's footprint.

Full swing bin lifters also need more height clearance than lift-and-tilt models so they may not be suitable for low ceiling areas like basements or underground car-parks (see table below).

For industrial work areas that deal with flammable materials, we recommend using the spark-free full swing Rugged—Manual bin lifter.

Bin lifter	Order code	Top point height (mm)
Full swing		
Niftylift	NIFTYLIFT30	2850
Rugged—Manual	BLHP1500/BLHP1500LL	3250

Full swing bin lifters

Niftylift

- Lifts up to 30 kg safely
- Suits 1500 mm skip bins
- Compatible with 120 and 240 litre wheelie bins
- Manual assisted lift operation with slow release gas struts
- Recommended for up to 2 lifts per day, per person
- Fits through internal doorways
- Made in Australia

Order Code

Niftylift bin lifter for 1500 mm skip bins

NIFTYLIFT30

Rugged—Manual

- Lifts up to 100 kg safely
- Models to suit 1500 mm or 1800 mm skip bins
- Compatible with 80, 120, 140 and 240 litre wheelie bins
- Spark free hydraulic hand pump operation
- Recommended for up to 10 lifts per day, per person
- Fits through internal doorways
- All-terrain model available for 1500 mm skip bins
- Made in Australia

Order Code

Rugged—Manual bin lifter for 1500 mm skip bins

BLHP1500

Lid lifter compatible, for 1500 mm skip bins

BLHP1500LL

All terrain model for 1500 mm skip bins

BLHPAT1500

Rugged—Manual bin lifter for 1800 mm skip bins

BLHP1800

Rugged—Powered

- Lifts up to 150 kg safely, up to 50 times per day
- Models to suit 1500 mm or 1800 mm skip bins
- Compatible with 80, 120, 140 and 240 litre wheelie bins
- Battery operated push button hydraulic system
- Fits through internal doorways
- All-terrain model available for 1500 mm skip bins
- Made in Australia

Order Code

Rugged—Powered bin lifter for 1500 mm skips

BLEH1500

Lid lifter compatible, for 1500 mm skip bins

BLEH1500LL

All terrain model for 1500 mm skip bins

BLEHAT1500

Rugged—Powered bin lifter for 1800 mm skips

BLEH1800

Lift-and-tilt bin lifters

Ecolift

- Lifts up to 50 kg safely
- Suits 1500 mm skip bins
- Compatible with 80, 120, 140 and 240 litre wheelie bins
- Crank handle winding operation for controlled lifting
- Recommended for up to 6 lifts per day, per person
- Safety cage panels eliminate hand crush points for operators and bystanders
- Made in Australia

Ecolift bin lifter for 1500 mm skip bins

ECOLIFT50

Simplicity Plus

- Lifts up to 150 kg safely
- Configured to suit 1500 or 1800 mm skip bins
- Compatible with 80, 120, 140 and 240 litre wheelie bins
- Battery operated push button hydraulic system
- Will lift up to 100 times per day on one charge
- Safety cage eliminates hand and foot crush points for operators and bystanders
- Made in Australia

Simplicity Plus for 1500 mm skip bins

SIMPLUS150HYD1500

Simplicity Plus for 1800 mm skip bins

SIMPLUS150HYD1800

Universal

- Lifts up to 250 kg safely
- Configured to suit 1500 or 1800 mm skip bins
- Compatible with 80, 120, 140 and 240 litre wheelie bins
- Battery operated push button hydraulic system
- Will lift over 100 times per day on one charge
- Safety cage and door eliminates all hand and foot crush points for operators and bystanders
- Made in Australia
