

Spacepac TrolleyMover - Standard Duty

**Can
you move
heavy
loads
this
easily?**

Compact battery powered material handling

This battery-powered material handler is perfect for increasing productivity and ensuring worker safety whenever heavy loads on wheels need to be moved. It is as easy to use as a pallet jack – except far more powerful. It's portable and convenient, with no electric cords or pneumatic hoses to trip over. No more injuries from moving heavy loads.

Features

- 24V NiCad rechargeable battery
- Compact size and user friendly
- Variable speed throttle control
- Programmable speed controller
- Speeds from .1 to 4.5 mph
- "Belly Button" stop switch
- Rugged steel frame construction
- Superior OEM Support

Spacepac TrolleyMover - Standard Duty

Designed for Safety and Productivity

Choose from pre-engineered hitches or create a custom one

24v Batteries specially designed for high torque use

Battery Charger with LED display

We engineered the TrolleyMover to keep workers safe.

We believe people like to be productive on the job. That's why so many injuries occur every year as workers try to move heavy loads by themselves. They either thought the load would roll on its existing wheels ... or they simply were not patient enough to wait for a lift or tow motor. Now the TrolleyMover can change all that.

The TrolleyMover is a heavy-duty tool, but light enough to be easily maneuvered by anyone. Our innovative battery-powered design provides the mobility needed to increase worker productivity while enhancing safe work practices.

Choose Your Hitch

The TrolleyMover can be equipped with any variety of pre-engineered or custom hitches to connect securely to various carts, bins, vehicles or other wheeled loads.
