

Spacepac Hygiene Queue Management

Spacepac & Barrier Group's innovative pedestrian and crowd control systems, Pilot and Neata, offer users an easy-to-deploy way to manage and guide pedestrians.

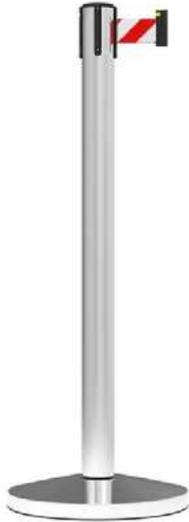

The Pilot and Neata Systems are in use by many of the largest organisations and facilities in Australia, as they offer reliable solutions that can handle high- throughput public and workplace spaces.

When combined with their innovative attachments, Pilot and Neata can also be designed to help foster hygienic practises

For example, with the cradle and pump bottle attachments and integrated signs promoting hygiene, the Pilot and Neata System can form an integral part of ensuring public and workplace safety and hygiene during the present COVID-19 outbreak.

Contact Spacepac Ind Pty Ltd dedicated sales team today at sales@spacepac.com.au or on **1300 763 444** to find out more about how these solutions can be used in your business or facility in order to improve public and worker safety and hygiene
