

Pallet Handling Systems

Multi-lane Palletising

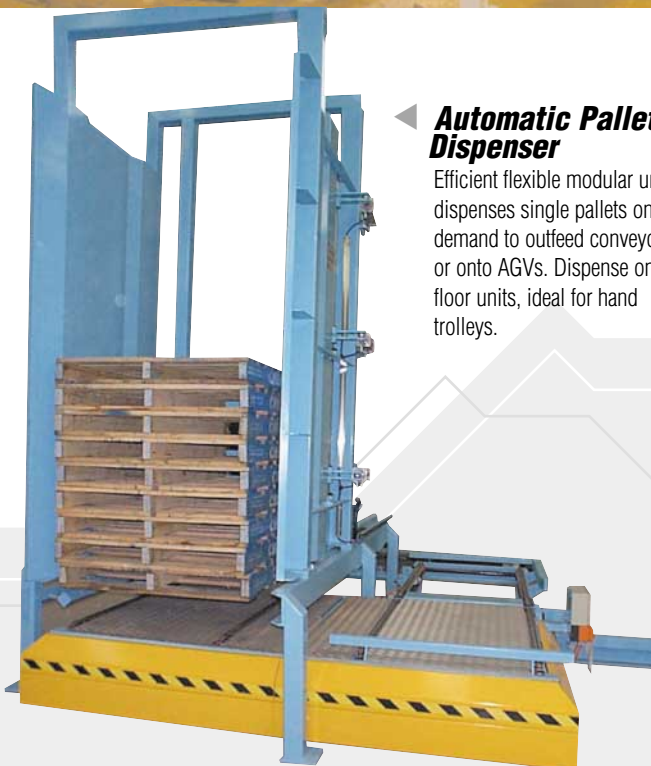

Fully automated robotic system servicing multiple lines with rollers and 90° chain transfers.

Automate your pallet handling to lower labour costs, preserve product quality and save valuable floor space. Empty pallet supply and storage, pallet routing or a blend of empty and full pallet handling technology to transfer, lift, and elevate for automated loading.

Automatic Pallet Dispenser

Efficient flexible modular unit dispenses single pallets on demand to outfeed conveyors or onto AGVs. Dispense onto floor units, ideal for hand trolleys.

Pallet Chain Conveyor

Transfer products around plant.

- 90° transfers
- Pallet accumulation
- Available with filling and weighing stations
- Pallet turntables
